

## ABOUT JOJO TANKS

**JOJO TANKS LIMITED** is a part of the Flame Tree Group of Companies which has been manufacturing tanks in Africa for over 15 years. With factories in over 7 countries in AFRICA, we have grown to become a recognized leader in the design and manufacturing of plastic bulk storage, processing and transportation tank systems.

At **JOJO TANKS LIMITED**, our state-of-the-art technology in production ensures that every product is consistently of the highest standard. All our products are quality controlled and are manufactured from the highest quality polyethylene. This food-grade material ensures it leaves no taste or smell to the water and extra long product life. Our commitment is to provide the most practical, strong and long-lasting products possible.

Our thousands of happy customers range from the water conscious city dwellers to the rural community relying on tanks for bulk water storage. We help people with their water & liquid storage needs in a variety of industries, including farming, rainwater harvesting, mining, wastewater and chemical handling throughout Africa.

Rainwater harvesting and collection tanks are a great way to catch and store rainwater for future use. At **JOJO TANKS LIMITED** we offer simple, low cost rainwater catchment systems that are of great value and come with everything you need to connect to the down spouts on your house. These are an excellent, low cost alternative to larger and more involved underground rainwater storage tank installations and are easily installed in just minutes.

We at **JOJO TANKS LIMITED** guarantee you efficient, friendly service. With a wide distribution network and telephone access six days a week, service is our priority.

## ADVANTAGES OF JOJO TANKS

Lockable Lid

Double Layered

- Best Quality
- Double Layered
- Food-Grade Material
- Best Value Price
- Lockable Lid
- UV Stabilised
- Extra Strong
- Long Lasting
- Seamless
- Durable
- Odourless
- Low Maintenance

## FREQUENTLY ASKED QUESTIONS

### Q. Where can I purchase a JOJO TANK?

A. Contact us or your local agent.

### Q. What materials are used to make JOJO TANKS?

A. **JOJO** products are made from only the highest quality food-grade polyethylene, a durable plastic, from which water tanks have been made worldwide for over 40 years. As a market leader with extensive experience in testing and quality control, you can be assured that you are getting the best!

### Q. Is polyethylene safe for water storage?

A. Yes. The high quality tank polyethylene we use at **JOJO TANKS LIMITED** is specially formulated for water storage. It is completely food-grade (FDA compliant for drinking water and food contact). The extruded Carbon Black >2% polyethylene also inhibits light, so it is resistant to algae growth. The high quality tank grade polyethylene has a UV stabiliser designed to handle the Kenyan sun.

### Q. Will JOJO TANKS make my water taste or smell?

A. No. The polyethylene used to make all **JOJO** products is food-grade, doesn't react with water in any way and therefore doesn't give off taste or odour.

### Q. Do the tanks have a seam?

A. Our tanks are made all in one piece. There is no seam in the tank itself. Though some tanks may look like there is a seam, what you see is the mark of the steel mould where it meets upon closure during the cooking procedure.

### Q. What's the delivery time?

A. Most tanks are available ex-stock from our offices. However, some orders may take a little longer, depending on the model and colour required. Call our offices for your tank today.

### Q. Where does JOJO TANKS deliver?

A. We deliver to most major towns in Kenya. For freight arrangements to other areas, please contact us.

## FREQUENTLY ASKED QUESTIONS cont.

### Q. Why are JOJO TANKS better?

- A. At **JOJO TANKS LIMITED** we make all our tanks to a high standard insisting on a minimum 3.5 times safety factor. This ensures that each tank is thicker than the minimum standards. We make our tanks from virgin polyethylene in computer machines which control the temperature and speed of rotation at all times to ensure such high standards. We randomly test and check our tanks to double check that all is as it should be.
- JOJO TANKS** are made double layered (outside black, inside white). The inside white layer gives you more visibility inside the tank. The tanks also come with lockable lids to ensure your water is kept safe. We have been making water tanks for over 20 years. We are industry leaders and have been consulted as advisors for government bodies.
